The Concerns of BEP20 Tokens without Actual Utility, Explained the fact that most BEP20 tokens were issued solely for the sake of launching ICOs is agreeable to a certain degree, since tokens are largely regarded as distributed “shares” by most developers and investors. However, after excluding exchange tokens (e.g., Binance Token (BNB), and stable coins (e.g., USD Coin (USDC), most BEP20 tokens possess limited usefulness.

What could you do with the tokens that you have bought without or limited Utility? The truth is the price of the tokens will collapse after buyers dumped them for profit on the market. And the main concern is that no one will ever buy the dips again since these tokens absolutely serve no purpose or usability and are meant to be redundant.

## **A One-Stop Ecosystem That Maximizes the Usefulness of Mufasah BEP20 Tokens.**

Mufasah, also known as MUF acts as the sole transactional currency, where it will be utilized in all forms of trades, contributions and payments across the entire ecosystem, thus forming the backbone of the ecosystem. The ecosystem is designed in a way to maximizing the usability of MUF.

We are developing new Robust trading platform for all crypto traders. Users will be able make instant transactions with cryptocurrencies in a highly secured manner.

The Exchange will use the latest techniques to secure your cryptocurrency transactions within wallets.

## FEATURES

- PIN Codes for Access to Coin
- Real-Time Payment Tracking
- Managing Of Cryptocurrencies
- Ability To Display the Wallet Balance
- Sending And Receiving Payment
- Live trading
- Buy / Sell Cryptos
- Order book
- Advanced trader chart candlesticks
- Private Block folio
- Technical indicators fully customizable
- Coins history data from 1 minute to 5 months
- Live data
- Live trending on chart
- Detailed Market analysis
- Live market (sell/buy) with market balancing
- Calculator (Cryptocurrency) notifications

At the present time, the trading of non-fungible tokens is on a rise. The most common type of NFT marketplace platforms is built on the Ethereum blockchain. The Ethereum based NFT marketplace platform is widely recognized by the crypto community, and it is relied upon more often in the domain. From crypto enthusiasts to the general audience, they are dependent on the Ethereum based NFT marketplace. Due to this high usage of transacting, it gives rise to high network congestion and high transaction costs. In order to solve these major challenges.

## **We are building a Multi-Chain NFT Marketplace.**

Our plan is to eliminate network congestions and keep the transaction costs at an economical level; therefore, creating a one-stop gateway for the Mufasah community to list and trade NFTs.

# S O C I A L N E T W O R K

## WE THE USERS...

Think about using a social media platform that incentive user for interacting with another and helping the platform grows.

200,000,000 MUF will be distributed to our users during the establishment phase. Users will be able to earn points for posting, liking, commenting, sharing etc. Earn points can be converted into MUF.

Once established 80% of the Social Network Platform (s) revenue will be shared among active users.

Mufasah Tokens will be used to pay to advertise on the platform, upgrade profile, boost posts, and pay for digital goods from another user, and much more.

# e C O M M E R C E

# P L A T F O R M

- Vendors will be able to sell anything from clothes to eBooks and get paid in Mufasah Tokens.
- Buyers will earn credits every time they purchase products via the marketplace.

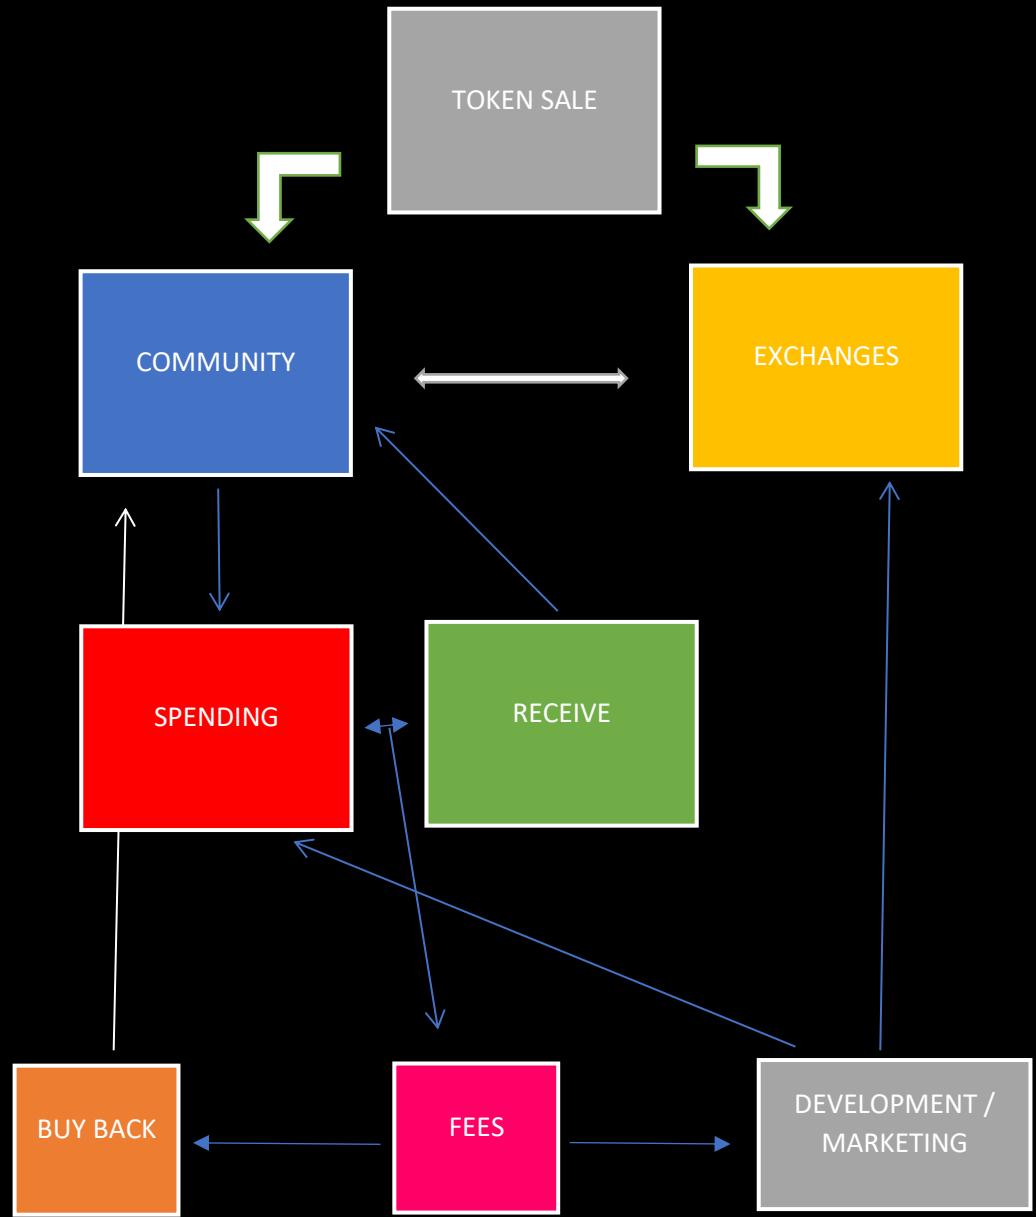

Once a buyer accumulates enough credit points, the buyer will be able to use the credits to receive a discount on future purchases.

## Fees

There will be small fee for each transaction that occurs on eCommerce Platform.

30% of the fees collected will be given make to members of our community random members of our community every month.
